The Perspectives Survey Examined Six Key Metrics:

1. Intellectual Humility

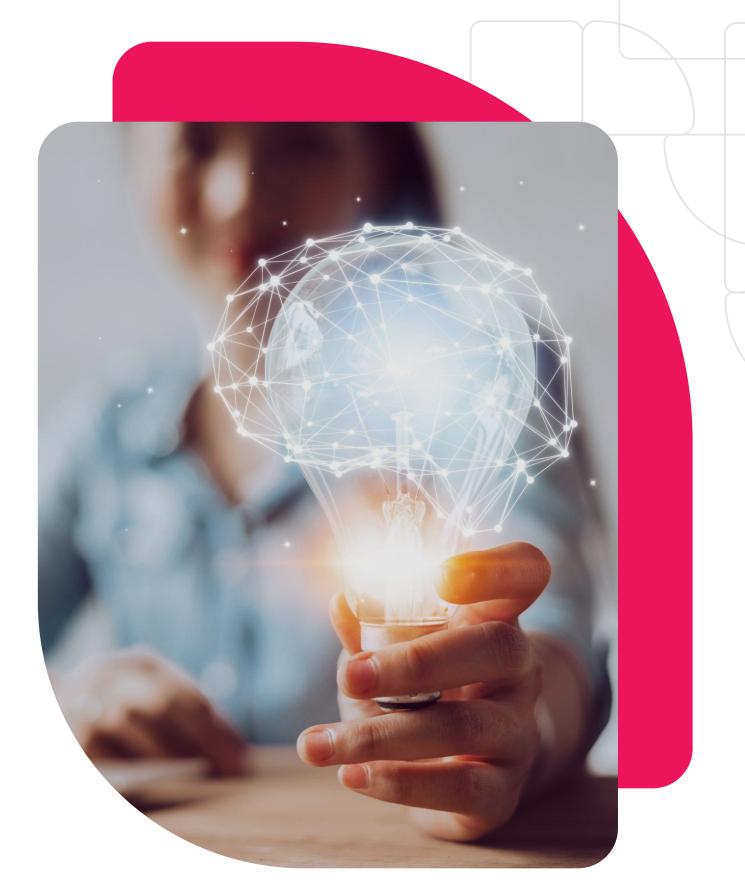

- The awareness of one's cognitive limitations and the fact that one could be wrong.
- "I accept that my beliefs and attitudes may be wrong."

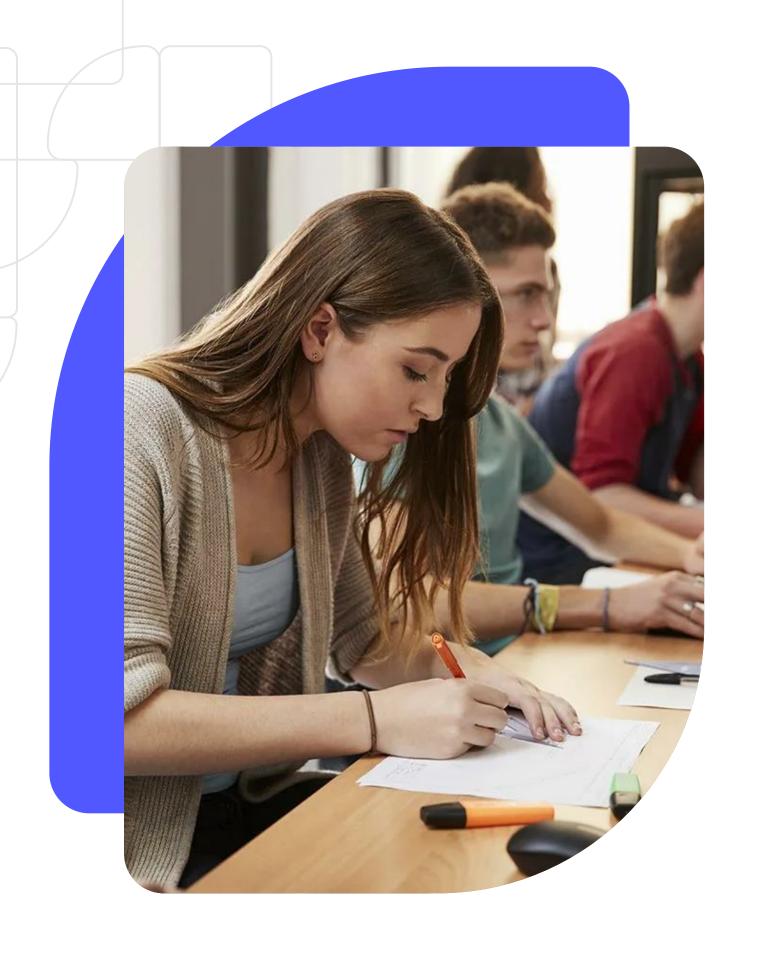

2. Affective Polarization

- The extent to which people dislike and distrust those with different political views.
- e.g., "How do you feel about about individuals who identify as liberal/progressive?"

3. Dichotomous Thinking

- The tendency to think in terms of polar opposites, without accepting possibilities that lie between these two extremes.
- "All questions have either a right answer or a wrong answer."

The Perspectives Survey Examined Six Key Metrics:

4. Conflict Resolution

- The ability to find a peaceful solution to a disagreement
- "When in conflict with others, I defend myself by showing it is the other person's fault."
- "When in conflict with others, I respectful questions to learn about what is important to the other person."

5. Psychological Safety

- The shared perception that it's safe to take interpersonal risks in a group.
- "If I make a mistake in this class, it is held against me."

6. Sense of Belonging

- How much a person feels they belong in a group
- "People at [school/organization name] accept me."

Your Students Compared To Other Students

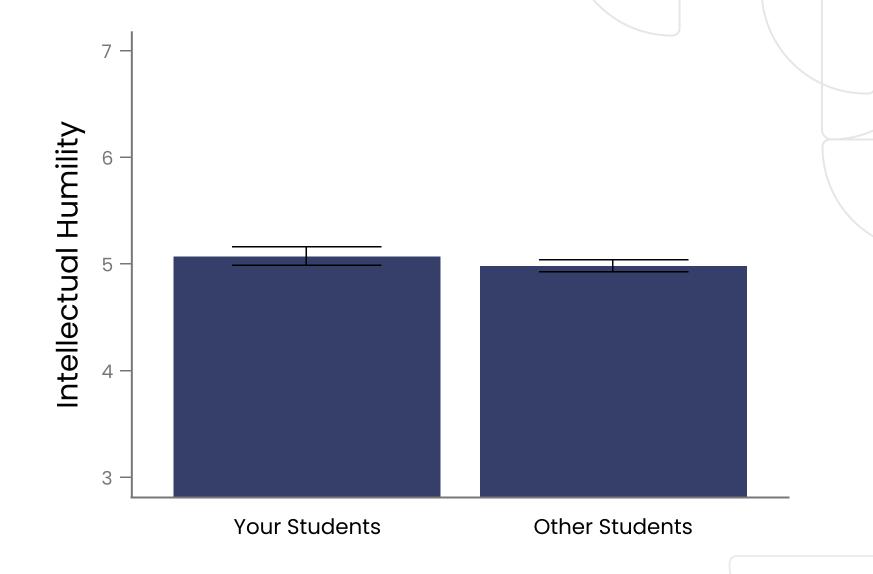

- Compared to other students, your students were...
- lower in belonging
- There were no other significant differences between your and other students.
